

Pathways to Enhancing Your Team Approach

Join Dr. Brian Van Brunt as he hosts a free monthly conversation related to the development of collaborative, multi-disciplinary teams such as behavioral intervention teams (BITs) or CARE teams. Brian will be joined by guests each month to discuss topics related to the ideal composition of a team, information sharing guidelines, the importance of having a training schedule, compliance with national team standards, how to conduct a self-audit, creating consistent documentation, culturally competent interventions, and addressing specific populations.

These free 45-minute sessions will involve 15-20 mins of instruction followed by conversation on the topic.

Visit pathwaystriage.com/webinars for more information and to reserve a spot.
